## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12 and 22-28 are drawn to a printing system apparatus and a method for configuring the printing system apparatus, classified in class 347, subclass 4.
  - II. Claims 13-21 and 29 are drawn to processing a print job, classified in class 358, subclass 1.15.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a materially different process, such as using the first printer of the system to print a first print job and using the second printer to print a second print job.
